

Meeting notes

Sandy Creek and Wolf Creek TMDL and I-Plan Meeting

Date: September 1, 2020

Time: 2:00 pm – 3:00 pm

Location: Online via Zoom

Meeting Summary

Welcome and Introductions

Michael Schramm (TWRI) began the meeting with brief housekeeping/instructions for remote sign in and how questions will be handled during the online session. Sign-ins were requested via a Google form with the url posted in the chat box for attendees to click and fill out. Schramm also introduced the project team and people on the call.

November Meeting Recap

Review of the meeting held on November 21, 2019

Schramm provided a brief review about the presentations and discussions at the November meeting. He also provided a little background on the watersheds and water quality data. Results of the questionnaire were provided.

Coordination Committee Formation

Overview of roles and responsibilities of the Coordination Committee and proposed members

Schramm reviewed the role of the coordination committee and provided list of proposed members and their respective representative agencies/groups. Schramm solicited the group for additional members of missing groups.

TMDL Technical Support Document Summary

Overview of the Technical Support Document

Schramm reviewed the content of the Technical Support Document. He provided some technical background on Load Duration Curves and load reduction analysis. He also summarized the watershed characterization.

What is Next?

Discussion of next steps in planning and implementation

Schramm provided some big picture context of the planning timeline and a discussion of planning needs. He then provided a discussion about items to discuss in upcoming meetings.

Meeting adjournment.
